

“The project was complicated & intricate, carried out under guidance of the LPA as well as English Heritage. We found Restore London to be thorough, entirely professional, transparent, and well versed in carrying out architecturally sensitive projects. The project was delivered on time and on budget, to the mutual satisfaction of all parties. 7BR would therefore recommend using Restore London to any organisation which has a similarly complicated task or challenge requiring tact, diplomacy, and outstanding levels of workmanship.

Harry Charlton - Chief Executive, 7BR

Scope of Works

Restore London have received huge plaudits for their DDA access solution Project at 7 Bedford Row which is a testament to what can be achieved when practicality meets aesthetics. Our team deconstructed the existing entrance structure to form a new aperture to house a powered disabled access solution. Working closely with our in-house Technical Services Manager and specialist subcontractor Sesame Access Systems, we installed the completely new lift system. After successfully managing the interfaces between the M&E design, fire system, CCTV and the existing listed building fabrics, the entrance/lift was reclad with new, matching mosaics & Carrara marble. Finally French polishing & redecorations were carried out all to the Client’s delight.
