

“Restore London were a pleasure to work with, their professionalism and attention to detail has ensured a quality project has been delivered to our client’s delight”.

Haydn Paul – Project Manager & Owner, Reflex 4

Scope of Works

Restore London designed & erected a full working access scaffold to the front of the store to expedite the works and to support the advertising banner. The works initially involved exemplar samples and analysis of the existing paint. Once our surveys were complete, we removed all ferrous fixtures & fittings, overhauling and consolidating the brick substrate. Lime render was applied as required in coats & was finished with a Mapei silan-colour paint. In addition, lead work, timber repairs, timber replacement & back of house works were carried out to carefully match existing decorations of railings, windows and other features completed the external refurbishment to a very high standard.

Project Name:	Armani Store
Location:	New Bond Street
Client:	Armani
Principal Contractor:	Reflex 4
Duration:	12 Weeks
Completion Date:	May 2017
Value:	£120K
