

“Restore London developed the design concept to provide a fresh contemporary feel to the lower floors whilst sympathetically cleaning and restoring the existing higher level stonework. The result of these works clearly shows the extent of Restore’s capabilities.”

Andy Lee, Project Manager -Mitie Group

## Scope of Works

The Restore London team carried out the cleaning & repair to the existing Bath & Portland stone external facade. We supplied & installed new Bath stone columns to the external facade & new bespoke designed Bath Stone precast spandrel panels.

Restore London also supplied and installed new ceramic tiling to the toilet core and Terrazzo tiles in the main reception of the building.
