

“Restore London are user friendly and consistently available to assist. The pro-active approach displayed by John and his team allows me to recommend their services without hesitation.”

Lee Hammond, Project Manager - CBRE

Scope of Works

Restore London Ltd in Partnership with CBRE re-designed, procured traditional York stone, matched the existing brick paviors, and undertook the contract to remove the existing stone paved feature and surrounding brick paviors and completely renew with new materials.

The works comprised of fully detailed site surveys and various paved patterns options were provided. New York stone & brick paviors were installed to exacting details and resulted in a stunning paved feature. In addition, Restore London’s skilled crafts team cleaned all facades of every building on the site, including full protection and pedestrian controls.
