

“Restore London are a relatively new Company and so far, so good. I have full confidence in using them on future façade restoration works.”

Sunny Bika, Project Co-ordinator Laxcon Group

Scope of Works

In conjunction with the Architect & Main Contractor, we undertook a full conditional survey of the facades of the building offering options and technical advice throughout. Exemplar trials and samples were carried out and recorded for all elements of the work.

The resulting cleaning and restoration project befits the conservation area setting. The scope included cleaning, restoration to Portland stone, red hand thrown and salt brown glazed bricks. Also included was the replacement of the cast iron rain water down pipes and guttering and new code 5 lead coverings.

Project Name:	Mount Street
Location:	Chesham Investments Ltd
Client:	London, W1
Principal Contractor:	Laxcon
Duration:	8 Weeks
Completion Date:	June 2017
Value:	£100K
