

“Restore London worked alongside us to deliver this unique refurbishment project. The cleaning, restoration and decoration of the brick façades contributed to the excellent end product & consolidated our longstanding relationship with their team. We will most certainly work with Restore in the future.”

Pat Gillham – Project Director, ISG

Scope of Works

Restore London transformed the outdated exterior of the building by cleaning, repairing & decorating the existing brick façade. Initially trialling and sampling various materials, our specialist team recommended the use of Keim mineral paints to an exacting, regulated specification, and scope. Restore London managed to exceed the Architect’s original intent by seamlessly blending the contemporary paint concept whilst meeting the requirement to maintain the feel of a more traditional brick façade.
