

“I have received very helpful assistance from Restore London on complex projects, estimates, budgets & presentations. Their team are reliable & dedicated, I would have no hesitation in recommending them.”

Nick Restall, RICS - Senior Quantity Surveyor, CBRE

Scope of Works

Restore London undertook various elements of work to the listed fabric both internally and externally. The principal task was the careful removal of vaulted brick arches in the basement to allow for the construction of a new lift aperture. Restore London built a new concrete structure including all foundations and structural modifications.

We carefully removed stonework and joinery from the Sackler gallery itself, before modifying and sympathetically re-introducing the materials into the new, remodeled gallery. Our team also undertook critical roofing, leadwork and re-positioning of roof access door work. The works were carried out on time, in budget and to the Client’s delight.

Project Name:	The Sackler Gallery
Location:	Piccadilly, London
Client:	The Royal Academy
Contract Administrator:	CBRE
Duration:	16 Weeks
Completion Date:	Nov 2018
Value:	£250K
