

“Restore London Restore London have offered excellent support to us on this Project, from the initial design & the very productive workshops, through to the complex design development phase, to the construction drawings and install, which our client has stated is the best quality he has ever seen. I would recommend Restore London to anyone looking for a high-end stone installation Company.”

Duncan Miller – Senior Site Manager, McClaren

Scope of Works

Restore London were appointed as Specialist Sub-Contractors to construct a completely new Portland Stone Facade in Oxford Street, London. Having worked successfully with our supply chain for the last 20 years we were confident that we had assembled a winning team for the project and so it proved. Working closely with Harrison & Goldman Ltd we were able to provide our Client with a bespoke, highly innovative stainless steel sub-structure system that allowed both the support and restraint of the new 75mm Jordan's Whitbed stone to what is a relatively light-weight structure. Our onsite team implemented a robust quality control regime, using our bespoke Project Management software, making for a fast tracked well sequenced install of the natural stonework. Restore London once again proving their status as a leading stone installer from initial samples to mock ups through to expert logistical solutions & quality control.
